

SUSTAINABLE DEVELOPMENT: TOWARD A BETTER FUTURE

Flora, fauna, landscapes, ecosystems

Agroforestry enhances carbon sequestration by integrating trees with farming, reducing greenhouse gases. It improves soil health, biodiversity, and climate resilience while generating carbon credits for farmers.

These credits incentivize sustainable practices, allowing businesses to offset emissions and support reforestation efforts.

**"Every tree counts.
Every data point
matters"**

CropIntellix offers a cutting-edge mobile app and dashboards tailored for agroforestry projects under carbon programs. Our tools simplify data collection and monitoring, ensuring seamless tracking of carbon sequestration efforts.

Designed for project developers and stakeholders, our platform enhances project management, data analysis, and carbon benefit assessment—making agroforestry initiatives more efficient, transparent, and impactful in carbon offset markets.

STREAMLINED DATA COLLECTION TOOLS

-  Log tree growth, species, and carbon capture metrics efficiently.
-  Captures age, height, and girth of each plant with location of each plant.
-  Automated and manual height and girth mapping features.
-  Feature to capture photos and location of each plant individually.
-  Works without Internet.

Automate and streamline the verification process with robust tools for accuracy and compliance.

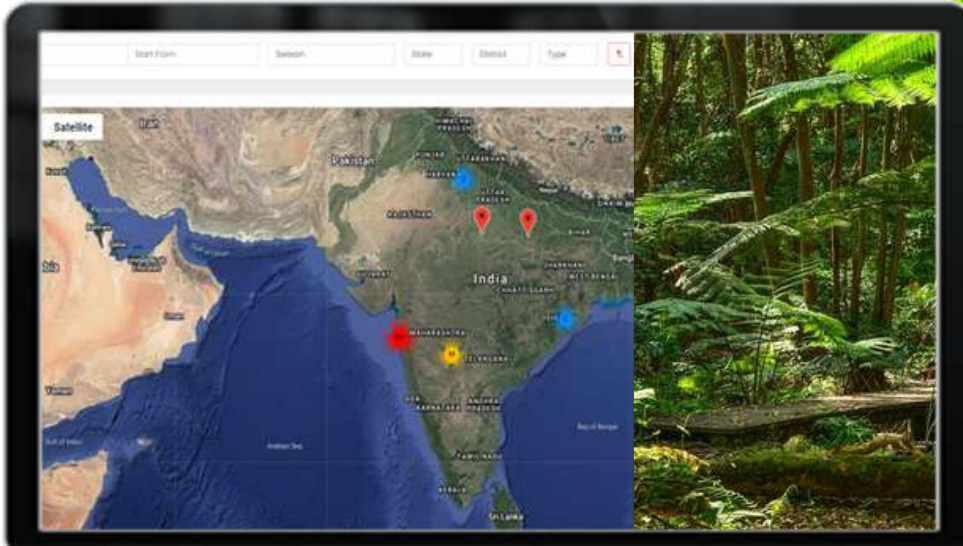

Foster seamless collaboration with field teams through integrated, real-time messaging and notifications.

Empower your team with a unified platform that enhances decision-making, boosts efficiency, and drives the success of your agroforestry or carbon credit projects.

"Stay inspired.
Never stop
creating."

-  Live monitoring of survey progress and data from the desktop
-  Data validation of all data collected by mobile app
-  Two Step Verification of data collected for 100% accuracy
-  Two way communication process between the validator and ground team
-  Optimizes field survey, saves time and resources
-  Integrated Data Analytics

"We bring all the information you need
to keep you at your best.."
